RADIOGRAPHERS BOARD OF HONG KONG
REGISTRATION OF RADIOGRAPHERS
GUIDE TO APPLICANTS

Introduction

The purpose of registration is to ensure the professional competence and good conduct of radiographers. The statutory basis for registration is contained in the Supplementary Medical Professions Ordinance (the Ordinance), Cap. 359, and the Radiographers (Registration and Disciplinary Procedure) Regulation (the Regulation). Registration of radiographers has commenced on 1 July 1995 and the regulation has come into effect on 1 November 1996. The relevant provisions in the Ordinance that prohibit the practice of radiography by unregistered persons have come into effect since 1 November 1996. Certain categories of persons are however exempted from registration. For details, please see Appendix I.

How to obtain application forms

2. Applications for registration should be made on the prescribed form. Such forms are obtainable in person, or on written request, from the Central Registration Office at 17/F, Wu Chung House, 213 Queen's Road East, Wan Chai, Hong Kong.

Categorization of radiographers

3. Registered radiographers are divided into 2 categories: diagnostic and therapeutic. A diagnostic radiographer is a radiographer who has been trained to operate:

- (a) radio-diagnostic, ultra sound and thermographic equipment for the purpose of radiological diagnosis; and
- (b) radionuclear equipment including isotopes.

A radiographer who has been trained to operate radiation therapy equipment for the treatment of diseases and (b) above is categorized as a therapeutic radiographer.

Qualifications required for registration

4. The register of radiographers is divided into four parts. Before completing the application form, applicants should study carefully the registrable qualifications as specified in Appendix II, for entry in various parts of the register.

Registration in other parts of the register

5. A registered radiographer may, after he has attained further qualifications and/or working experience, which qualify him for registration in other part(s) of the register, submit a fresh application for this purpose.

Restrictions on the practice of radiographers

6. The restrictions on the practice of radiographers as stipulated in section 15 of the Regulation are reproduced at Appendix III.

How to complete application forms

7. Completed application forms should be witnessed and signed by a person belonging to one of the following categories:

- (a) Radiographer registered in Part I of the register;

- (e) Commissioner for Oaths.

8. The place where the witnessing was done should be entered after “Signed at.....” on page 2 of the application form.

9. If an applicant has more than one business address, he should indicate which is the principal one by a symbol “#”.

Documents to be submitted together with the completed application form

10. Applicants should submit four passport size (50mm x 40mm) photographs, including one to be pasted onto the photograph box in the application form. In addition, photocopies of the following documents, certified true by a person belonging to one of the categories stipulated in paragraph 7, should be submitted:

- (a) Hong Kong Identity Card, or Passport;
- (b) Diploma or certificate (if any) relating to qualifications in radiography (if the qualification is not one of those specified in sections B of Appendix II, transcripts of study and documentary proof of hours of study for each subject area, including those of clinical practicum should also be produced);

Applicants who do not possess formal qualifications in radiography for submission under (b) should provide other relevant documents such as letter(s) certifying working experience from employers, duty lists, business registration certificates, membership cards of professional associations, attendance certificates at professional conferences, etc., to strengthen their proof of experience in practising this profession.
