OCCUPATIONAL THERAPISTS BOARD OF HONG KONG
REGISTRATION OF OCCUPATIONAL THERAPISTS
GUIDE TO APPLICANTS

Introduction

..... The purpose of registration is to ensure the professional competence and good conduct of occupational therapists. The statutory basis for registration is contained in the Supplementary Medical Professions Ordinance (the Ordinance), Cap. 359, and the Occupational Therapists (Registration and Disciplinary Procedure) Regulations. Under the Ordinance, all practising occupational therapists should be registered. Moreover, at least one director of every occupational therapy company must be registered in Part I of the register. Certain categories of persons are however exempted from registration. For details, please refer to **Appendix I**.

2. The register for occupational therapists is divided into three parts. Persons registered in Part I can practise without supervision, whereas those registered in Part II or III can only practise under the supervision of a person registered in Part I. The deadline for applications for provisional registration (Part III of the register) was 30 June 1991. As the provisional registration is a one-off exercise, applications for registration under this category are no longer acceptable.

How to apply for registration

3. Applications for registration should be made on the prescribed form. Such application forms are obtainable in person, or on written request, from the Central Registration Office at 17/F, Wu Chung House, 213 Queen's Road East, Wan Chai, Hong Kong.

Qualifications required for registration

..... 4. Before completing the application form, applicants should study carefully the qualifications required for registration in Part I or II of the register as specified in **Appendix II**.

Registration in Part I of the register and Guidelines on Supervision

..... 5. Applicants for Part I registration are requested to submit the form at **Appendix III** that should be duly completed by their supervisor(s) for documentary proof. A separate form will be required for each employment or each supervisor may complete a new form. Applicants should read carefully the guidelines at **Appendix IV** before completing the form at **Appendix III**. A registered Part II occupational therapist should submit a fresh application for registration in Part I of the register.

Note 1 :

Definition of supervised clinical training

Supervision refers to the process of overseeing the student's implementation of an OT process, where the supervisor is responsible for the quality of the student's practice and for the safety of the recipient of occupational therapy. Recipients should be real clients with genuine OT needs for assessment and intervention. There should be clinical interaction between students and recipients. It is likely that supervision will initially include (a) discussion with the student; (b) review of the student's intervention plans and records; and (c) observation of the student's actions.

The amount and frequency of supervision will progress from close on-site supervision to independent practice as students progress through the program. The level of supervision will also vary with students' knowledge base, familiarity with the practice setting and their learning needs; the contexts of practice – including the presence or absence of other health professions; the complexity of the occupational therapy intervention to be provided and the level of proficiency required for it to be effective; and the safety risks for both students and recipients of occupational therapy.

Note 2:

Applicants may apply for exemption from taking IELTS if they could provide proof that their English proficiency is comparable to the requisite IELTS levels. Applications for exemptions would be considered on individual merits.

Note 3:

The requirement on registration status and practising right shall be exempted for applicants who have enrolled in, are studying or have been graduated from the OT programmes before 1 April 2016. Applicants who enroll in studying the OT programmes on or after 1 April 2016 are required to comply with this requirement.

Note 4:

The appropriate experience obtained should be supervised by a registered occupational therapist. Applicants for Part I registration should have obtained not less than 1 years' recognized experience. Applicants for Part II registration should have obtained appropriate experience of not less than 30 hours.

- (3) Persons who have fulfilled the above criteria for registration 12(1)(b) are eligible for registration in Part II of the register.
- (4) Holders of the registrable qualifications with not less than one year's post-qualification experience are eligible for registration in Part I of the register.

- (5) For verification of applicants' qualifications, applicants are invited to complete the authorization form at Appendix VI for the Occupational Therapists Board to verify with the institutions directly.

D. Criteria for registration under section 12(1)(c) of the Ordinance, and entry in various parts of the register

Applicants who possess very rich experience in practising occupational therapy but who do not possess any formal qualifications may apply for registration under section 12(1)(c) of the Ordinance. Each application will be considered on its individual merits on a case-by-case basis. The education, training, professional experience and skill will be taken into consideration.

**Guidelines on Supervision for
Occupational Therapists in Part II of the Register**

General Principles

1. Section 6(2) of the OT Regulations provides that a person registered in Part II of the register can only practise under the supervision of a person registered in Part I. Practice under supervision for one year full-time or equivalent is also one of the requirements stipulated by the Board for Part I registration.
2. The purpose of supervision is to enable occupational therapists with Part II registration to -
 - (a) develop knowledge and competence, and good standard of practice;
 - (b) assume responsibility for their clinical practice; and
 - (c) enhance the delivery of safe and effective occupational therapy services to the public.
3. Both quality and quantity of supervision are essential for ensuring effective supervision.

Role of Supervisee, Supervisor and Employer

4. The role of different stakeholders involved in supervision are set out as follows -
 - (a) A *supervisee* should:
 - initiate a clear supervision agreement (with objective) with the supervisor(s);
 - maintain a cooperative relationship with the supervisor(s) based on respect for supervisor's/supervisors' knowledge, competence and experience;
 - provide the supervisor(s) with information on the duties and scope of practice;
 - consult the supervisor(s) in complex clinical situations;
 - take proactive steps in approaching the supervisor(s) for review and discussion on a regular basis;
 - provide a confidential case summary for periodic review by the supervisor(s);
 - maintain a supervision log with details of the date, duration and nature of supervision; and
 - attend trainings as suggested by the supervisor(s).

(b) A *supervisor* should:

- maintain a collaborative relationship with the supervisee(s) in an effort to establish, maintain and enhance their professional competence and performance through close supervision and case observation, and ensure the safe and effective delivery of occupational therapy services by the supervisee(s);
- cooperate with the employer of the supervisee(s) to ensure that coaching, training and critical reflection in day-to-day practice issues could be carried out;
- ensure that supervision form is completed in a timely manner for registration application purpose;
- provide regular performance review, e.g. case review and documentation audit to the supervisee(s) during the supervision period; and
- provide an annual review (based on the actual results achieved as measured against the agreed supervision objective) to the supervisee(s) by the end of the supervision period.

(c) An *employer* should:

- be aware of the requirements of occupational therapists registration in Hong Kong;
- maintain a cooperative relationship with the supervisor(s) of their occupational therapist employee to ensure the delivery of an effective supervision; and
- facilitate the supervisor(s) in providing on-site visits and case study with their supervisee(s) in practice settings where necessary.
